

Monthly Update

Fund commentary

- iCar Asia and Vinamilk release encouraging updates
- Stronger Australian Dollar offsets some of the portfolio's gains
- New position in Budweiser APAC initiated

Portfolio holding iCar Asia rose strongly after releasing a positive trading update to the market. Underlying operating conditions, particularly in Thailand, have been at the more optimistic end of expectations modelled by management at the beginning of the coronavirus outbreak. Management also proactively reduced expenses, helping offset the impact of softer revenues, so much so that operating cash outflows for the second quarter are expected to be in the range of A\$1.2-1.3 million.

Vietnam Dairy Products (Vinamilk) also contributed positively after reporting stable operating results for the first quarter. With mid-single-digit revenue growth and stable profitability, Vinamilk performed materially better than other FMCG business in Vietnam despite headwinds in its

school milk program. As the market leader in Vietnam's dairy category we expect Vinamilk's position to strengthen in the current environment thanks to brand loyalty and familiarity driving demand.

Currency effects offset some of the positive performance of the equity portfolio as the Australian Dollar rebounded strongly (along with global equity markets). The Fund currently has a 35% exposure to the Australian Dollar; the majority of the remainder being in US and Hong Kong Dollars. The Australian Dollar outperformed most Asian currencies over the period.

The invested position increased with a new position in Budweiser APAC initiated. No positions were exited during the month.

.....

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

.....

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 14 years' industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore.

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Asian Companies Fund?

Asia-specific: The Fund focuses on companies listed or operating in Asia (ex-Japan), giving unrestricted exposure to the world's fastest growing region.

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 113% since inception.*¹ The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.
