

Monthly Update

Fund commentary

- Freeport-McMoRan's Grasberg mine reaches cash flow inflection.
- Online classified marketplace holdings, iCar Asia and Frontier Digital Ventures, drive performance on company-specific news flow.

During the month, portfolio holding Freeport-McMoRan released its third quarter results which were ~20% above consensus. More importantly, however, the result also demonstrated another quarter of solid execution at Grasberg in Indonesia. Cash flows are now at an inflection point with Grasberg production ramping up meaningfully over the next two years.

Frontier Digital Ventures raised A\$100 million, with the proceeds used to acquire three businesses from global marketplace operator Adevinta. The capital raising was well supported by investors, with the portfolio participating in the institutional entitlement offer. All three acquired businesses hold dominant market positions in their verticals and fit with

Frontier's existing portfolio of assets. The 3.5x price to sales multiple is not reflective of the quality of the assets; rather, seller Adevinta is rationalising a large portfolio after the acquisition of eBay's Classifieds business this year.

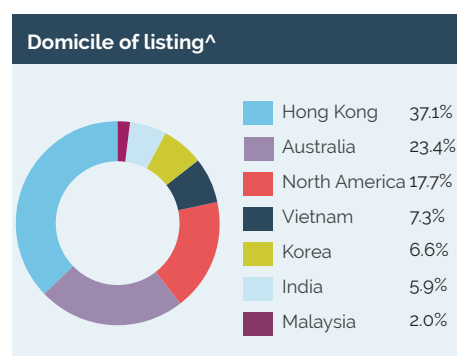

Portfolio holding iCar Asia received a non-binding takeover offer from Autohome Inc., the owner of China's largest automotive classifieds marketplace. The offer of A\$0.50 per share, a 51% premium to its closing price prior to the offer, values the company at A\$216 million. While iCar Asia's share price rose materially post the announcement, as at the end of the month it remained below the offer price given its non-binding nature.

^{*} Stated at effective value.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Kevin Bertoli is the Portfolio Manager, who has over 14 years' industry experience and has managed the Fund since its inception. Kevin is supported by a team of experienced investment analysts. The investment team is led by founder and CIO Paul Moore.

We believe in being a patient investor, one that has conviction, one that sees opportunities where others only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Asian Companies Fund?

Asia-specific: The Fund focuses on companies listed or operating in Asia (ex-Japan), giving unrestricted exposure to the world's fastest growing region.

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 15 - 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 108% since inception.*¹ The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM CAPITAL Asian Companies Fund (ARSN 130 588 439, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the current Product Disclosure Statement which available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term.

1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is the MSCI All Country Asia ex Japan Net Total Return Index in Australian dollars, net dividends reinvested. See www.msci.com for further information on the Index.
