

Monthly Update

Investor note: Exposure allocations listed below for cash, cash equivalents and investment grade securities with 12 months or less to maturity have now been separated to provide more granular information to unitholders. They were previously aggregated. There has been no change in the Fund's investment strategy.

Fund commentary

- Our airport investment theme takes off
- Market starts to speculate about pre-Basel III bank bonds

November was another strong performance month for the Fund, particularly in light of the current effectively zero RBA cash rate environment.

Our strategic investment in the recovery of Australian and New Zealand airports performed well. Our holdings in Melbourne Airport, Brisbane Airport, Auckland Airport and Air Services Australia Corp (the Government-owned air traffic control business) all rallied as positive global vaccine news sees borders being opened up between most states in December, in conjunction with domestic passenger traffic that is already running ahead of expectations.

The Fund's holdings in floating rate major bank subordinated bonds also performed well, particularly our

ANZ and Westpac holdings which, at the end of next year under new Basel III guidelines, are unlikely to retain their status as subordinated debt on bank balance sheets (given they were issued well before Basel III guidelines were introduced). This has prompted market speculation that they may be redeemed at levels notably above the heavily discounted prices at which we bought them.

A number of our European holdings, including French industrial services company SPIE and Irish retail bank Allied Irish rallied strongly, as the proven effectiveness of numerous vaccines around the world provides light at the end of the COVID-19 tunnel for struggling European nations.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

Jarod Dawson has been the Portfolio Manager since 2004. Assisted by John Whelan and David Murray, together they have over 40 years' combined industry experience. They are supported by the broader investment team, with Paul Moore as CIO who has over 34 years' experience in successfully managing investment funds.

Why the Enhanced Yield Fund?

Dependable: A minimum 20% cash position helps the Fund to preserve capital and achieve its return objectives with low volatility. The Fund's process is effective and repeatable, based on a compelling philosophy. This Fund has been producing attractive returns for co-investors for more than 17 years, and is one of the longest running yield funds of its kind in Australia.

Careful: We have an authentic investment process where our exposure to industry sectors, geographic regions or market capitalisation is determined solely by our conviction in individual risk/reward opportunities that we identify. All holdings within the Fund have been intensively researched by our investment team. No conviction = no investment.

Co-investment: Our co-investors receive access to a unique subset of opportunities which they would otherwise find difficult to replicate. PM Capital has a meaningful investment in the Fund - we invest for and with you.

Key Fund Details

Fund category

Fixed income

Investment style

Fundamental, bottom-up-research intensive approach

Inception date

1 March 2002

Fund size

\$500.3 million

Strategy size

\$731.2 million

Minimum direct investment

\$20,000

Recommended investment time

Two years plus

Fees (p.a.)

*Performance Fee Option:

Management fee: 0.55%.

Performance fee: 25% of net excess above RBA Cash Rate (subject to a high watermark).

**Management Fee Option - Class B units:

Management Fee: 0.79%.

Buy / sell spread

+/- 0.15%

Investor profile

The Fund may be appropriate for investors seeking capital preservation and potential return in excess of the Reserve Bank of Australia's (RBA) cash rate with a low degree of volatility.

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM Capital Enhanced Yield Fund (ARSN 099 581 558, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or a recommendation, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the Product Disclosure Statement which available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term.

1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is RBA Cash Rate. See www.rba.gov.au for further information.
