

Monthly Update

Fund commentary

- Market rotation accelerates over the month, providing significant portfolio gains
- Exited position in Southern Copper

For the past six months or so we have said that some of the best quality industrial and cyclical businesses traded on all time relative low valuations as the COVID-19 crisis hit. Since then there has been a rotation from growth and momentum sectors to value, a situation that accelerated in early November when news of Pfizer's successful vaccine trial was announced. This significantly benefited the portfolio, providing one of its strongest-ever months.

During November the best performers were our European bank holdings - up over 30% on average. Their valuations were still severely depressed leading into the month and despite their appreciation are trading on single digit forward earnings multiples.

They have expedited their cost saving programs and have material excess capital beyond regulatory requirements. Reinstating dividends in early 2021 (dependent on permission from the European Central Bank) should be a catalyst for further upside.

We exited our holding in miner Southern Copper during the month. Southern Copper is among the highest quality copper mining companies globally - its mines are low cost with long lifespans - but it now trades on a valuation exceeding 20 times earnings at the spot copper price. Absent a continued higher copper price we believe the share price is close to its potential. We reallocated the capital elsewhere.

Domicile of business[^]

[^] 'Domicile of Listing' represents the location of stock exchange listing of each entities' head office, whereas 'Domicile of Business' represents the location of the predominant business of those entities.

PM Capital Limited, founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Investment philosophy

We aim to build long term wealth together with our co-investors by finding and exploiting investment anomalies. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. This mispricing can arise as a result of any number of reasons, but is most often associated with disruptive or cyclical change, new information which is misunderstood by the market as having a permanent impact when it is in fact transitory, or just because they are operating in a sector out of favour with investors.

Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Who manages the investment?

The Portfolio Manager for the Fund and CIO is Paul Moore. Paul is supported by a team of experienced investment analysts.

We believe in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Why the Global Companies Fund?

Established: The Fund's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to industry sectors, geographic regions or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify within portfolio guidelines. No conviction = no investment.

Opportunistic and focused: The Fund is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the Fund holds around 25 - 45 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Our co-investors receive access to a unique subset of opportunities to which they would otherwise find difficult to access. The management team have significant investments in the Fund - they invest for and with you.

Outperformance: The Fund *has outperformed the relevant market index by 307% since inception.*¹ The Fund is managed from an Australian investor's perspective with consideration for tax and currency outcomes.

Key Fund Details

Fund category

Global equities

Investment style

Fundamental, bottom-up research intensive approach

Inception date

28 October 1998

Fund size

\$387.9 Million

Strategy size

\$1,070.1 Million

Number of stocks

As a guide, 25-45 stocks

Minimum direct investment

\$20,000

The Fund may be appropriate for investors seeking capital appreciation over a seven plus year investment horizon

Important Notice

This Report is issued by PM Capital Limited ABN 69 083 644 731 AFSL 230222 as responsible entity for the PM Capital Global Companies Fund (ARSN 092 434 618, the 'Fund'). It contains summary information only to provide an insight into how we make our investment decisions. This information does not constitute advice or recommendations, and is subject to change without notice. It does not take into account the objectives, financial situation or needs of any investor which should be considered before investing. Investors should consider a copy of the current Product Disclosure Statement which is available from us, and seek their own financial advice prior to investing. The PDS explains how the Fund's Net Asset Value is calculated. Past performance is not a reliable guide to future performance and the capital and income of any investment may go down as well as up due to various market forces. The investment objective is not a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. 1. Returns are calculated from exit price to exit price assuming the reinvestment of distributions for the period as stated and represent the combined income and capital return. The Index is the MSCI World Net Total Return Index in Australian dollars, net dividends reinvested. See www.msci.com for further information on the Index.
