

Net Tangible Assets & Monthly Investment Report

28 FEBRUARY 2021

Company commentary

- Rising treasury yields and a spike in commodity prices were catalysts for a sudden rotation from growth and momentum to cyclical and value stocks during February. The portfolio was well positioned to take advantage of this rotation.

Commodity and gaming exposures were primary drivers of performance in February. With COVID-19 vaccine rollouts accelerating and investors increasingly looking to a post-virus economic recovery there has been a clear shift in favour of sectors benefiting from this positive outlook.

Copper reached a high of US\$4.36 – a price level not seen since 2011 - before closing up 15% for the month. As investors increasingly look to commodities as an avenue to play an economic recovery, there is growing recognition of the potential for a material supply shortage in the copper market over the coming years (something that has been central to our thesis from day one).

While copper was among the strongest commodities over the month it was not alone, with crude oil also recording

material gains. Higher crude prices directly benefit CNOOC, a recent addition to the portfolio, but also improves sentiment towards our oil and gas infrastructure holdings Kuntun Energy and Sinopec Kantons.

Reporting season underscored a growing optimism among our Macau holdings. All operators achieved EBITDA breakeven in the fourth quarter and this is set to improve further as authorities reduce the remaining barriers which have restricted a meaningful recovery in visitation over the past months. From a health standpoint, the Macau government's management of the COVID-19 pandemic has been exceptional, with no locally transmitted cases in over 300 days.

Net Tangible Asset (NTA) backing per ordinary share (After fees and expenses, all figures are unaudited) ¹	February 2021	Company performance (net of fees) ²	1 Month	1 Year	3 Years p.a.	Since inception p.a.	Total Return

PM Capital Limited ('the Manager'), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Asian Opportunities Fund Limited (ASX:PAF, ACN 168 666 171) is intended to provide investors with an opportunity to invest in the Asian region (ex-Japan)¹ via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 22 May 2014.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of typically 15-35 quality companies within Asia ex-Japan that it believes are trading at prices different to their intrinsic values.

Who manages the Company's portfolio?

Kevin Bertoli is the Portfolio Manager, who has over 15 years' industry experience and is supported by a team of experienced investment analysts. The PM Capital investment team is led by founder and CIO Paul Moore.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can,

and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Asian Opportunities Fund Limited?

Asia-specific: The Company focuses on companies listed or operating in Asia (ex-Japan)¹, giving unrestricted exposure to the world's fastest growing region.

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 15 to 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investment in the Company - it invests with and for you.
