

Net Tangible Assets & Monthly Investment Report

31 MARCH 2021

Company commentary

- Gaming and commodity companies retract a portion of strong year-to-date performance
- Announcements from Kunlun Energy and Turquoise Hill Resources well received by the market supporting share prices

Performance was mixed in March. Several standout performers from the month of February gave back a portion of the gains achieved, including gaming and commodity companies (copper and oil). Given the recent strength it is not unexpected to see share price volatility month-to-month and our investment theses remain unchanged.

In line with the performance of commodities and commodity companies the Australian Dollar retraced some of the gains achieved over recent months and this partially offset the negative impact on the portfolio from moves in the above holdings.

Beyond the broad macro factors driving directional moves in equity prices over the month several portfolio holdings

were impacted by company-specific news events. Most notably were Kunlun Energy and Turquoise Hill Resources.

Kunlun Energy declared a special dividend at their annual results release equal to 50% of the proceeds from the disposal of their 60% stake in PetroChina Beijing Gas Pipeline Co.. The special dividend represents a yield of 34% at Kunlun Energy's month-end share price.

Turquoise Hill Resources bucked the wider downward trend witnessed among copper companies, advancing after another positive statement from management regarding the funding gap required to complete the Oyu Tologai underground operation. The company was also reinstated to the S&P/ TSX Composite Index which drove passive buying.

Net Tangible Asset (NTA) backing per ordinary share (After fees and expenses, all figures are unaudited) ¹	March 2021	Company performance (net of fees) ²	1 Month	1 Year	3 Years p.a.	Since inception p.a.	Total Return
NTA before tax accruals	\$ 1.1026	PM Capital Asian Opportunities Fund	-0.8%	38.4%	1.6%	6.1%	50.2%
NTA after tax (excluding deferred tax assets)	\$ 1.0884						

1. Past performance is not a reliable indicator of future performance. 2. Performance adjusted for capital flows including those associated with the payment of dividends and tax, share issuance as a result of option exercise and the dividend reinvestment plan.

PM Capital Limited ('the Manager'), founded in 1998, is a globally-focussed fund manager that invests money on behalf of private clients, the clients of financial advisers and institutions. PM Capital's goal is to build long term wealth by investing in global markets with patience and conviction.

Company profile

The PM Capital Asian Opportunities Fund Limited (ASX:PAF, ACN 168 666 171) is intended to provide investors with an opportunity to invest in the Asian region (ex-Japan)¹ via an Australian Securities Exchange (ASX) listed investment company. The company began trading on the ASX on 22 May 2014.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of typically 15-35 quality companies within Asia ex-Japan that it believes are trading at prices different to their intrinsic values.

Who manages the Company's portfolio?

Kevin Bertoli is the Portfolio Manager, who has over 15 years' industry experience and is supported by a team of experienced investment analysts. The PM Capital investment team is led by founder and CIO Paul Moore.

PM Capital believes in being a patient investor, one that has conviction, one that finds opportunities where others can only see risk. We only invest in what we know, deeply, via our fundamental research.

Investment philosophy

PM Capital aims to build long term wealth together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can,

and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Asian Opportunities Fund Limited?

Asia-specific: The Company focuses on companies listed or operating in Asia (ex-Japan)¹, giving unrestricted exposure to the world's fastest growing region.

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 35 years. This has produced attractive long term capital growth.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. As a guide, the portfolio holds around 15 to 35 deeply researched stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: Shareholders receive access to a unique subset of opportunities to which they may otherwise find difficult to access. The Manager has a significant investment in the Company - it invests with and for you.
