Company commentary

- Slight pullback following gains in prior months
- Siemens the standout performer

The portfolio ended lower in January as value and cyclical names pulled back after recent gains. The pullback was moderate but broad-based. A notable exception was Siemens, which rose strongly as preliminary earnings showed good revenue growth and expanding margins across most business units. Our investment thesis – that the true value of Siemens' high quality industrial businesses was obscured by its complicated conglomerate structure – is starting to play out post the Energy spin-off. Siemens has re-rated upwards relative to other capital goods companies in the past quarter.

roughly in line with market expectations. A sometimes overlooked aspect of our Freeport investment thesis (and that of peer miner First Quantum) is its rapidly improving balance sheet. For much of the past decade Freeport mixed its natural commodity price leverage with substantial financial leverage – a combination highly susceptible to market downturns. Freeport's deleveraging again continued in the quarter, and the balance sheet is heading towards net cash in the next few years. A cleaner balance sheet should drive Freeport's valuation multiple closer to that of peers Southern Copper and Antofagasta.

PM Capital Limited ('the Manager'), founded in 1998, is a leading Australian based fund manager that has successfully achieved its goal of building long term wealth for its clients by investing in global markets with patience and conviction.

Company profile

The PM Capital Global Opportunities Fund Limited (ASX:PGF, ACN 166 064 875), which began trading of the ASX on 12 December 2013, provides investors with an opportunity to invest in global equities via an Australian Securities Exchange (ASX) listed investment company.

Managed by PM Capital (AFSL 230222), the aim is to create long term wealth through a concentrated portfolio of around 40 global companies that it believes are trading at prices different to their intrinsic values.

PM Capital has been operating its global investment strategy via an unlisted fund since October 1998. This unlisted fund's performance adjusted to reflect PGF's fee structure has produced a total pre-tax return of 755% vs the MSCI World Net Total Return Index (AUD) of 212% to 31 January 2021.

Manager's comparable track record

Who manages the Company's portfolio?

The Portfolio Manager for the Fund and CIO is Paul Moore. Paul is supported by a team of experienced investment analysts.

Investment philosophy

PM Capital aims to build long term wealth

together with our co-investors by finding and exploiting investment anomalies around the world. Using a focused, patient and considered approach to finding simple investment ideas produces the best environment for creating that long term wealth.

Our experience has shown us that while the market is largely efficient, it can, and regularly does, misprice a small proportion of companies. Our unique process is based on scanning the world for those companies (hence the radar in our logo), discovering the associated valuation anomalies and extracting value from them. We buy good businesses at a good price; businesses that we believe are being valued differently to their long term intrinsic value, but will return to their correct value over time.

Why the PM Capital Global Opportunities Fund Limited?

Established: The Company's process has been shown to be effective, based on a philosophy developed by Paul Moore, over 34 years.

Unrestricted: We have an authentic investment process where our exposure to countries, industry sectors or market capitalisation is determined solely by our conviction in the risk/reward opportunities that we identify in individual stocks. No conviction at the stock level = no investment.

Opportunistic and focused: The Company's portfolio is not built around a general market benchmark or index - it is highly focused based on our fundamental, bottom-up investment process. The portfolio only holds those stocks that we believe give the best opportunity to produce strong long term returns.

Co-investment: The Manager has a significant investment in the Company - it invests with and for you.
